

## American Recovery and Reinvestment Act of 2009 Stimulus Projects Reporting Requirements

I am sending you this email to introduce you to our Employment/Job Creation and Project Tracking solution for American Recovery and Reinvestment Act of 2009 (ARRA) stimulus projects.

As you are aware, employment and project tracking and reporting are crucial elements in the ARRA requirements. It is a burdensome task for contractors to collect, track and submit this data, and for the government agency to consolidate and submit all of the required documentation

LCPtracker has a readily available solution. Our software is a web-based labor compliance Prevailing Wage solution that can be turned on and configured in a matter of days. Contractors can submit all data via the web, **and reports are generated electronically.**

Hundreds of government agencies, all throughout the United States, already use LCPtracker, including 9 of the top 25 cities, like Chicago, Houston, Denver, and San Antonio, as well as, 4 State DOT's, Transit Agencies, Airports and Universities.

LCPtracker will have, as standard, the following reports:

- Monthly Employment Report 1589
- Monthly Recipient Project Status Report 1585
- Monthly Summary Employment Report 1587
- FHWA 1391 Report

For anyone that may be interested in a web-based solution for the ARRA reporting requirements, we would appreciate you passing on our information.
