Pre-loaded Employee Names
- Employee data rolls over week to week

Paper Free
- Go green! Online data storage

LCPcertified is a cloud-based certified payroll solution for construction sites. It allows users to enter data freely and easily with the purpose of producing clean, accurate certified payroll reports (CPRs). It is ideal for any public works prime or sub-contractor that has a need to provide certified payroll reports to any requesting body.

LCPcertified integrates with many payroll companies, and will produce clean and accurate certified payroll reports for any project throughout the country. Payroll interfaces support the most widely used payroll solutions in the construction industry to ensure that contractors can easily upload their payroll data.

For contractors in California, LCPcertified produces the XML file that can be uploaded to the Department of Industrial Relations (DIR) of California website. Electronic submission for qualifying public works[**] projects in California is a requirement starting January 1st, 2016, regardless of the project bid-ad date.

[**]some exceptions to this law apply on certain projects

LCPtracker

An Automated and Simple Way to Create Certified Payroll Reports from your Payroll Data

Features and Benefits

- Ensure CPRs are formatted to federal and state standards
- Manage fringe data that appears on the CPR
- Store a historial record of all payroll data
- Avoid the hassle of double entry after filing payroll
- Easily manage federal and state wages using a rate table

California Specific

- Contractor uploads standard payroll data to LCPcertified
- Verify correct payment for CA wages
- LCPcertified allows the user to apply California specific craft and classifications to their employees
- Validations verify that the employees are paid as per the state requirements
- LCPcertified ensures all data is properly formatted on all reports
- Contractor submits report online to the state, confident of no errors
- LCPcertified produces the XML file that can be uploaded to the website for the Department of Industrial Relations of California.

Benefits for Subcontractors

- Manual entry of payroll information
- Ability to import payroll/employee data from numerous payroll systems
- Easy to learn to use – less than an hour is typical
- Immediate check of compliance with wage and hour laws & prevailing wage laws
