# Daily Reporter

## [INFO]

## Daily Reporter Software Module is Ideal for:

- Project owners ensuring compliance for the construction site
- Prime contractors or construction managers in charge of daily reports
- Busy construction sites where time-saving tracking is always needed

### Features and Benefits

**Accuracy of Your Data**
Matches your daily reports with your Certified Payroll Reports

**Automated Notifications**
Notifies you of discrepancies between daily logs and Certified Payroll Reports

**Time Savings**
Foremen submit logs in a few moments

**Financial Benefits**
Reduces the risk of potential fraud and fines

**Online Access**
Available on phones, tablets and any web browser

**Pre-loaded Employee Names**
Employee data rolls over week to week

**Paper Free**
Go green! Online data storage

LCPtracker's Daily Reporter is an advanced software module that allows for easy submittal of daily reports electronically at the construction site.

Foremen can submit daily reports using their mobile devices in just a few moments. Daily Reporter, combined with LCPtracker Pro, will also compare each foreman daily report to the Certified Payroll Report submitted by the subcontractor payroll administrator.

## Change Orders:
## Save Money, Ensure Payment

Manage your subcontractors change orders by validating work descriptions, employees, craft/classification and hours worked, thus ensuring work being done is a legitimate addition to the original task order.

When billing a legitimate change order to the owner, having proof of the activity and change in the daily report is essential to verify the change order should be paid.
