

Workforce Manager [INFO]

Customizable, Cloud-Based Application to Track and Monitor Workforce Development Initiatives

- Allows organizations to manage programs and accomplish their workforce goals
- Provides insights on ROI of workforce training and supportive services programs
- Supports worker development and career advancement initiatives

Key Features

Highly Customizable

Add modules to support your workforce program needs

Workforce Tracking

Collect worker data and track their career progress

Third-Party Collaboration

Connect securely with other groups and organizations

ROI Insights

Measure key metrics and ROI of workforce programs

Job Referrals

Match workers with available job opportunities

Local Program Tracking

Track community initiatives that encourage worker and local business development

Workforce Manager is a cloud-based application that provides government agencies, prime contractors, and community-based organizations an efficient, secure, and collaborative way to manage their workforce development programs.

The system is highly customizable. Build your system from the ground up starting with the core module of Intake and Assessment and add additional modules according to your program needs.

- Intake and Assessment: Provides robust functionalities to support and manage workforce data collection and career journey tracking.
- Supportive Services: Allows users to connect with supportive services groups and track requests.
- Referrals and Placement: Provides the ability to match workers with available job opportunities.
- Contractor: Adds more comprehensive workforce program tracking for contractor users.
- Regional Collaboration: Allows collaboration with organizations in the same region to show combined workforce development efforts.
- Business Economic Impact and Community Development Opportunity: Focuses on supporting and tracking the economic growth of the local community.
